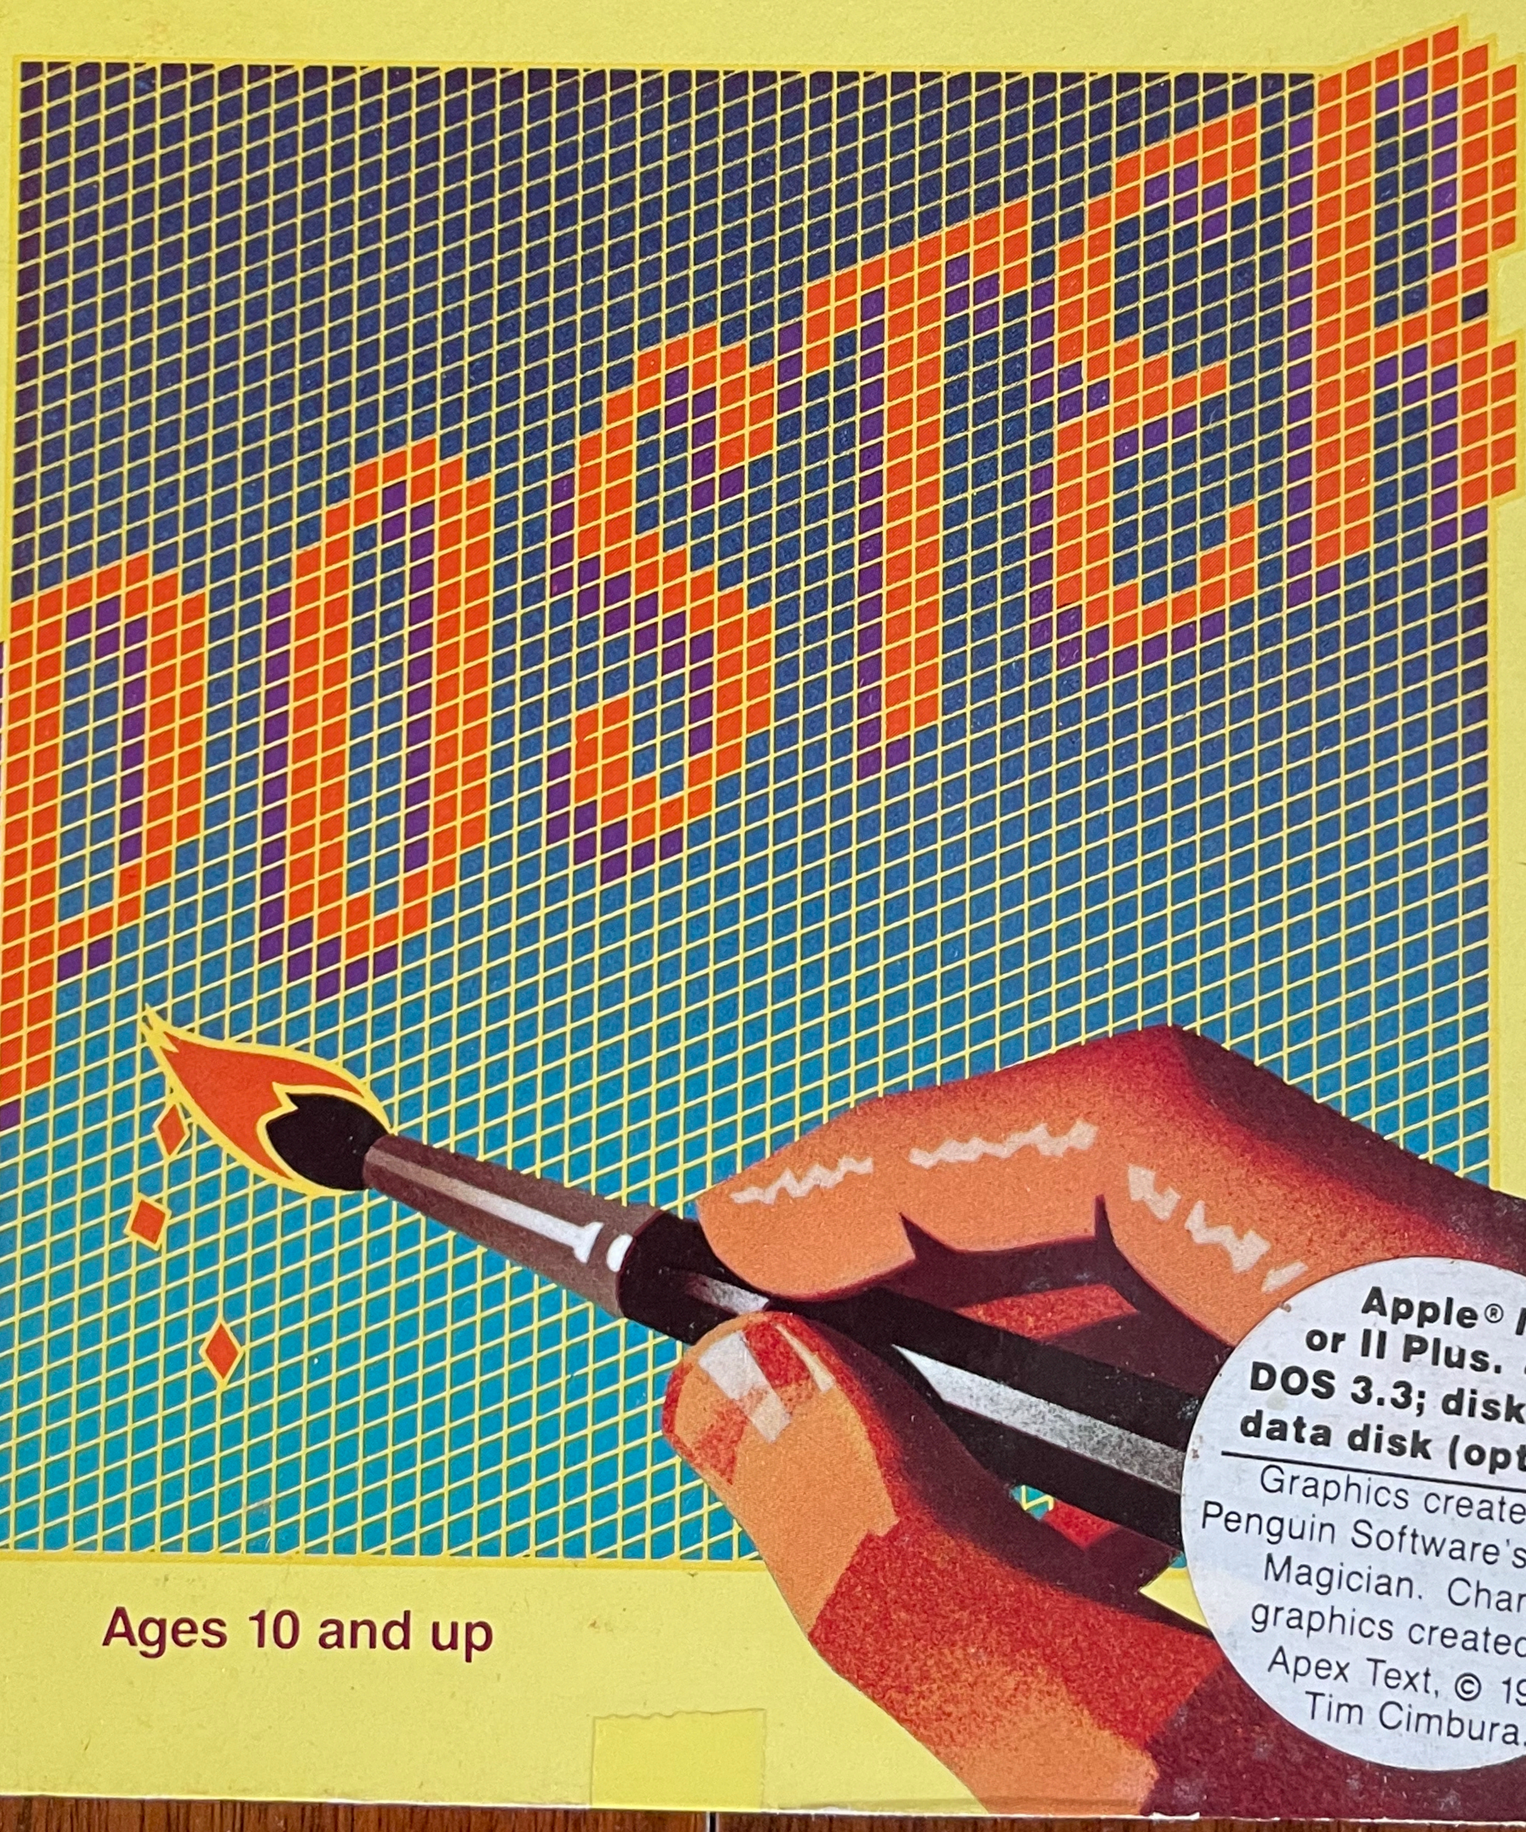
Scholastic Wizware™

A simple computer graphics language for creating screen pictures.



Ages 10 and up

Apple® *IIe* or II Plus. 48K, DOS 3.3; disk drive; data disk (optional).

Graphics created with Penguin Software's Graphic Magician. Character graphics created with Apex Text, © 1983, Tim Cimbura.

Scholastic Wizware™

Wizware programs are specially designed to help young people get the most fun out of learning and the most learning out of fun. Created by Scholastic, the largest publisher of children's books and magazines in the English-speaking world, Wizware programs are challenging, exciting, thought-provoking, and flexible.

POSTER

Designed and Developed by ITDA

POSTER is a simple, but powerful, programming language that lets you create colorful computer graphics. Easy-to-remember commands allow you to select backgrounds and control brush colors, sizes, and speeds — you can even program brush noises. Simple animations are possible, too. You can run , edit , or save your POSTER programs easily.

POSTER lets you explore your own creativity and learn the basics of programming.

Contents: 1 disk, 1 handbook

Learning Opportunities: Programming; problem-solving; computer literacy; planning and organizing skills

Package Design: Sandi Young **Illustration:** Michael Doret and Laura Smith

ISBN 0-590-95222-6

95222

078073 024957

The screen photographs above are of the Commodore 64® version of this program. Please note that colors and graphics may vary from computer to computer.
